**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6,472,901. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both directed to the method for in situ electrical testing of a flip-chip semiconductor assembly during its manufacture (see claims 1). The only difference is the changing the term "said" in Patent 6,472,901 to -- the-- throughout the claims of the instant application; however, -- the-- is broad enough to include "said" in the patent '901.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2813

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7, next to last line, "the conductive pads on the conductive pads" is confusing and indefinite. Does the applicant mean – the conductive pads on the electrical pads-- ?

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Lin (cited by applicant).

See Lin, figs. 1-6 and text on col. 4-8 which discloses the claimed method for electrically testing a flip-chip semiconductor assembly 10 during its manufacture, the assembly being formed from a substrate 22, 34 and one or more IC die 12 (see fig. 4), including connecting the substrate 22 to the test apparatus at die-attach station 28(test apparatus is not shown, see col. 7, lines 25-31); aligning and bringing the one or more IC die 12 into a flip-chip-type conductive contact with the substrate 22, 34 so interconnection bump 16 on the IC die are in conductive contact with the conductive pads 24 on the surface of the substrate 22 (fig. 1) while it is connected to the test apparatus at the die-attach

station 28 to form flip-chip semiconductor assembly; and electrically testing the assembly at the die-attach station 22 using the test apparatus.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. King et al. is cited as of interest.
